## Shoe Snippets

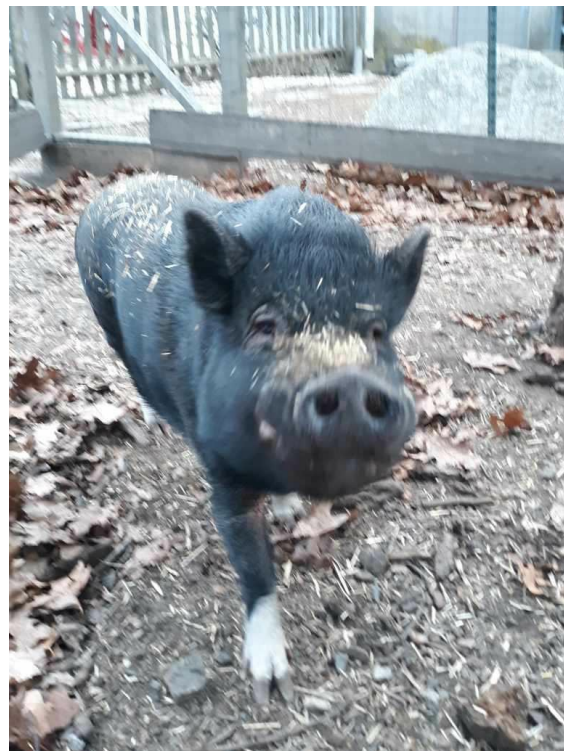

*Fun facts about the historic Cummings Center site, formerly known as "The Shoe"*

The restoration and transformation of the 2 million-square-foot Shoe site was one of the world's largest industrial plant recycling projects. Approximately 32 acres of interior space were completely restored. Some of the original structures are still visible. For example, the 100-E and 100-L glass entrances of 100 Cummings Center were built around the existing concrete structure.

## Simple Smiles

Simple Smiles was created to help everyone start the week off learning, imagining, and smiling. We invite all North Shore News readers to submit photos of something or some place they find interesting, informative, or exciting. Please refrain from sharing photos that feature people.

The following photos were provided by Cummings Properties project architect **Dave Harriss**.
