**ELEVATOR #3 UPDATE
AT 400 WEST CUMMINGS PARK**

We have awarded a contract for the reconstruction of Elevator #3, which we now anticipate will resume operation this summer.

Given the significant scope of the project, we expect this work to take up to 45 days following receipt of the necessary components. These components, including new motors, and electrical and mechanical controls, have been ordered and will take approximately 120 days to be manufactured and delivered.

Once the reconstruction is complete, Elevator #3 should operate “like new,” as nearly every component is being replaced. In the meantime, Elevators #1 and #2 are available for use by all clients and visitors.

We appreciate your continued patience during this major building upgrade. Please contact your account manager, Robb LaBossiere, at rrl@cummings.com or 781-932-7049 with any questions
