

Cummings Properties Notice to Clients

WINTER PARKING REMINDER

With tonight's forecast calling for snow, we are providing a general reminder about our winter parking regulations. We appreciate your cooperation, as it enables our Snow Team to keep Cummings Properties' parking lots accessible for clients and their employees and customers.

Client firms' employees and visitors may park their vehicles in our standard on-site parking lots during normal business hours (7:00 AM – 7:00 PM). Between 7:00 PM and 11:00 PM, vehicles may remain parked in these lots, without the need for a permit, provided the driver is readily available during a snow event to relocate the vehicle whenever necessary – otherwise, the vehicle could be towed. **Please note that any vehicle obstructing snow removal operations between 7:00 PM and 7:00 AM will likely be towed at the vehicle owner's expense.** We also recommend that vehicles be parked in garages at properties that have this convenient amenity.

In the event a vehicle must be left completely unattended between 7:00 PM and 11:00 PM or parked overnight, approval *must* be received *in advance* from Cummings Properties, and the vehicle *must* be parked in a designated winter parking space (identified by the blue and white “snowflake” signs). Upon approval, we will provide a permit for prominent display on the dashboard of each vehicle. Permits may be requested by phone at 781-935-8000 or in person at 200 West Cummings Park.

Vehicles left in designated winter parking areas must be removed each morning to facilitate snow removal from these areas, and may not be left in winter parking areas during normal business hours.

Thank you in advance for your cooperation.
